B Disclaimer

Multi Peril Crop Insurance - A 25 Year Performance Comparison
INFORMATIONAL DISCLAIMER

Although GRP and GRIP Federal Multi-Peril Insurance, and the private County Yield endorsement policy are newer plans of Crop Insurance, the 25 year historical record is accurately based upon the crop yield statistics determined and provided by NASS-National Ag Statistics Service and by the actual CBOT-Chicago Board of Trade and/or KCBOT-Kansas City Board of Trade spring and fall grain prices. The illustrations of the 25 year past loss performance of the plan are historically accurate, but illustrations used in the presentation are not a guarantee of future results.

APH, CRC, and RA rates are based on the new CONTINUOUS RATING calculation. The crop coverage premiums illustrated are estimates. -Final Spring Crop premium determination will be made March 1, 2002, and Fall Crop premium determination will be made September 15, 2002 at the times USDA-RMA sets final crop planting prices and volatility factors.
